Did you just get a new fangled digital camera? Take control of your camera and images! Learn how and why to shoot in all modes, including manual. Learn all amazing things your camera is capable of that you never knew were possible!

This class covers basic camera mechanics, selection of film type, shooting modes, auto and manual focus, and flash. Photographers will learn the fundamentals of exposure and begin to understand shutter speeds, f-stops, and ISO settings. White balance, metering modes, and impact of light direction will also be demonstrated. Opportunities for outdoor shooting and take-home assignments will reinforce classroom instruction.

Bring your digital camera and instruction manual to class.
