

## Session Descriptions Friday, March 16, 2018

### STUDENT SESSIONS

#### **Planning for Success in the Multigenerational Workplace**

Presenter: Dr. Mark Taylor

*This session helps students understand what they will encounter when they enter a workplace with a mixture of four generational cohorts; Traditionals, Boomers, Xers and Generation NeXt. Their workplace success and advancement will require being able to understand, communicate with, work with and probably lead people from each generational group. Understanding typical generational values, traits, preferences and styles can improve their employability, workplace effectiveness and success at work. This program addresses the generational issues and dynamics in the workplace with suggestions for what they can do during their college experience to improve their personal effectiveness in the multigenerational workplace. The focus is both on future success at work and academic success in college now.*

#### **Makeover, Break's Over! Getting Real About Life**

Presenter: Dr. Adolph Brown

*This interactive & dynamic presentation will serve to enlighten, encourage, and motivate attendees to have Continuous Improvement throughout their academic, professional and personal endeavors. Focus will be placed on Doc's "5 C's of 21st Century Workplace & Life Skills:" Critical Thinking, Creativity, Communication, Collaboration & Character.*

### FACULTY, STAFF, and COMMUNITY PARTNERS SESSIONS

#### **Two Backpacks: Unpacking the Unseen**

Presenter: Dr. Adolph Brown

*In this seminar, Dr. Brown successfully addresses the needs of all young people and adults alike, by sharing the importance of dealing with the issues in your backpacks before they deal with success and happiness. Doc demonstrates how the connective capacity of good educators lead to student success and retention with field-tested strategies. This session is designed to greatly increase student achievement across ethnicity, gender, language, and is designed to provide innovative data-driven evidence based practices to support high-risk students with a variety of social and academic barriers to postsecondary success.*

#### **Teaching All Learners: Principles and Techniques of Research Informed Instruction**

Presenter: Dr. Mark Taylor

*Today's classroom can be a mix of generational cohorts and competency levels. This program will describe a model of research informed teaching designed to motivate and direct the necessary learning behaviors in students for meaningful learning outcomes for all students.*
